

QOpenGLFunctions

```
classDiagram
    class QOpenGLFunctions
    class GraficadorHistograma
    class VentanaDeGraficacion
    GraficadorHistograma ..|> QOpenGLFunctions
    VentanaDeGraficacion ..|> QOpenGLFunctions
```

The diagram illustrates a class hierarchy where two classes, GraficadorHistograma and VentanaDeGraficacion, inherit from the QOpenGLFunctions class. The inheritance is represented by dashed lines with hollow triangle heads pointing towards the superclass. The superclass is positioned at the top, while the subclasses are positioned below it, side-by-side.
